

Northwell Health Firefighter Cancer Study

“All Hands” Needed to Combat Cancer in Volunteer Firefighters

The purpose of this study is to determine how many members of the **Volunteer Fire Service in New York State** have **developed cancer and died from cancer** over the past few decades. Your **participation is crucial** to getting you and your fellow firefighters the **coverage and programs you deserve** for prevention and treatment of cancer.

How to Participate

1. Email ffcancerstudy@northwell.edu with the **email address** of the person from your department who will be completing the data collection forms
2. Use the link that will be emailed by the study team to open the online data collection form and upload:
 - a. **Your Fire Department Information**
 - b. **Personnel Information Files**
